

BAGUS ADHI NUGROHO

085780776870 | bagusadhinugroho95@gmail.com | www.linkedin.com/in/bagusadhi8 | <https://github.com/Velkh>

Informatics Engineering graduate specializing in backend development, system refactoring, and IT infrastructure. Experienced in delivering scalable web dashboards and designing complex database architectures. Proficient with modern backend frameworks, and cPanel server management. Adept at utilizing modern AI workspaces to accelerate and optimize development workflows. A proactive problem-solver with advanced English proficiency, dedicated to building robust information systems.

Experience

Tim Kerja Penyehatan Lingkungan, Dinas Kesehatan Kota Depok - Depok, Indonesia	Aug 2025 - Jun 2026
<i>Full Stack Web Developer (Intern & Thesis Researcher)</i>	
- Collaborated directly with the Environmental Health Working Team to digitize and optimize public health and sanitation monitoring workflows. - Rebuilt and upgraded the legacy food hygiene oversight system into Lalapan Depok using Laravel 10. - Initiated and developed Dashboard SLHS as a final-year thesis project, executing a comprehensive system refactor to integrate multiple environmental health oversight entities into a single platform using Laravel 12. - Architected a streamlined multi-tier Role-Based Access Control (RBAC) system. - Developed highly specific administrative permission models to securely manage monitoring data for distinct business types (SPPG, Restoran, Jasa Boga, DAM, and Kantin) across various districts. - Managed production server deployments and system file directory configurations using cPanel to ensure seamless application delivery for the health office.	

Education

Politeknik Negeri Jakarta - Depok, Indonesia	Aug 2022 - Jun 2026
<i>Bachelor (Applied) of Informatics Engineering, 3.67/4.00</i>	
CCIT FTUI - University of Indonesia - Depok, Indonesia	Aug 2022 - Aug 2024
<i>Associate of Informatics Engineering, 3.36/4.00</i>	
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka	Sep 2024 - Dec 2024
<i>Cloud Computing Cohort</i>	

Projects

Dashboard SLHS Kota Depok	Jan 2026 - Jun 2026
<i>Full Stack Web Developer</i>	
- Initiated a comprehensive system refactor to integrate multiple public health oversight entities into a single, centralized web dashboard using Laravel 12. - Architected a streamlined multi-tier Role-Based Access Control (RBAC) system, specifically structured for Admin Dinkes and Admin Kecamatan. - Developed highly specific administrative permission models to manage distinct business types (SPPG, Restoran, Jasa Boga, DAM, and Kantin) securely across various districts. - Managed production server deployments and system file directory configurations using cPanel	
Lalapan Depok	Aug 2025 - Dec 2025
<i>Full Stack Web Developer</i>	
- Upgraded legacy applications to Laravel (v10). - Designed a centralized database featuring a custom, multi-tier RBAC authorization system. - Managed local development (Laragon) and production server deployments (cPanel). - Validated UI/UX functionality via Black Box testing to ensure bug-free institutional deployment. - Maintained version control disciplines using Git.	
FoCal (Food Calories)	Jan 2025 - Jul 2025
<i>Full Stack Developer, NLP Developer</i>	
- Developed an Information Retrieval using Python for Indonesian food using TF-IDF and cosine similarity to deliver meaningful, context-based results. - Implemented advanced filters such as food category, calorie level, and numeric calorie range. - Built modular and scalable backend APIs using Flask, serving both web and mobile clients for seamless integration.	

- Designed and built a responsive web frontend using React.js, Tailwind CSS, and Vite for fast and dynamic UI performance.

TMS (Targetted Money Saver)

Oct 2024 - Dec 2024

Backend Developer, Cloud Engineer

- Developed the RESTful API using Hapi.js to manage user data.
- Integrated Firestore for storing structured savings data.
- Implemented image upload and retrieval functionality using Google Cloud Storage for secure and scalable file storage.
- Built the API for ML models using Flask to classify product categories from user input text.
- Deployed the RESTful API to Google App Engine and the ML API to Cloud Run for isolated and scalable service architecture.
- Managed IAM roles, service accounts, and environment configuration to ensure secure cloud operations.

Skills, Achievements & Other Experience

- **Soft Skills:** Problem Solving , Team Collaboration, Self-Learning & Adaptability, Time Management, Communication Skills
- **Hard Skills:** HTML, CSS, JavaScript (Node.js), Python (Flask), Java (Android), PHP, SQL,Laravel.
- **Software Skills:** Visual Studio Code, Postman, Git, Firebase Console, Google Cloud Console, Figma, Docker, Android Studio, Microsoft Office, Linux (basic CLI)
- **Language** 🇮🇩: Bahasa Indonesia (Native) , English (Intermediate – Working Proficiency)
- **Certifications** 🎓: Bangkit Academy (Cloud Computing Track) – Google, Goto, Traveloka, Google IT Support Professional Certificate – Coursera, CEP CCIT FTUI – Graduation Certificate in Software Engineering, DNIIT (Software Engineering – Java Technologies) – NIIT India International Certification, Junior Web Developer - BNSP, Associate Data Scientists - BNSP
